To FCC,

I would like to let you know that I'm very concern about the upcoming change/deregulation of the local media ownership rules by the FCC. Since 1996 we have had major consolidation in ownership of local media. At present the majority of the local stations are own by just two companies and with even more deregulation we will have total control of the local media, TV and radio stations by just one in some cases two companies. Diversity of opinions, attention to the local issues, variety of programming will suffer even more.

Please do what you can to stop this media consolidation trend.

Thank you

Sergey
